Events – Lunch & Learn Webinars

Wednesday, July 13, 2016, noon – 1:00 PM

Topic/Theme: Enabling Actionable Real-time Data Through Cloud Analytics As A Service

Presented by: Joanne White, CIO
&
Mark Gerschutz, Director of IT
Wood County Hospital

Registration Link:

<https://attendee.gotowebinar.com/register/3509916367497654531>

Presentation Description:

Tapping into clinical data provides an opportunity to gain insight that not only improves patient care and population health but, also impacts reimbursement. In partnership with G2 Works, the cloud analytics as a services company, we're leveraging services enabling operational visibility and impact across departments and services lines.

Events – Lunch & Learn Webinars

Wednesday, August 10, 2016, noon – 1:00 PM

Topic/Theme: Privacy and Security in a HealthCare—What you need to know

Presented by: John DiMaggio
CEO & Founder
BlueOrange Compliance

Abstract

Privacy and Security of patient data is becoming even more of an issue as security breaches are often a daily news item. Cyber threats are on the rise and are becoming a leading cause of breaches. In addition, HIPAA/HITECH enforcement for multiple government agencies and upcoming Office for Civil Rights audits also emphasize the importance of protecting information in a compliant manner. Healthcare organizations are also increasingly exchanging electronic information with hospitals, physicians and business associates. This session will provide attendees with the facts surrounding privacy, security and breach laws, and how to operate securely and meet regulations.

Events – Lunch & Learn Webinars

Wednesday, December 7, 2016, noon – 1:00 PM

Topic/Theme: How can we enhance our end users experience?
A pragmatic approach to improving provider & clinical end user log on times.

Presented by: John Flamand

Manager-Systems and Operations Management and Compliance (SOMC) practice
Lochbridge

Description

A large not for profit multi-hospital health system wanted to identify ways to enhance their end user (provider) experience. They suspected issues with extended log on times for their providers, clinical end users and general users. Knowing they had good people who manage their infrastructure i.e. server, network, storage, MVD & desktop engineering e.g. They also realized their infrastructure teams operated in silos and many of the issues involved multiple infrastructure teams. The Health System required identification of bottlenecks across their infrastructure silos. The approach included bringing together key infrastructure stakeholders, technologies and interdependencies as well as implementing processes to monitor end user performance.
